About.

INTRODUCTION TO ELEMENTS

The Earth is continual and reliable, yet constantly shifting and changing. It embodies the hard, solid objects of our world and can be seen in both the towering mountains and the humble pebble.

In Eastern philosophy Earth is often associated with the attributes of physicality, stability, collectiveness and confidence.

Inspired by these characteristics, our Elements range reflects the shape, structure and angular profile of stone whilst retaining its ability to move and change with a sureness of action and response.

The Elements modular lounge creates collaborative work settings designed to support small groups of four to eight students. Custom configurations can be created to suit larger groups.

This guide contains multiple products from the Elements modular lounge range which have been curated into one specification guide for your convenience. Note that each product may be subject to different pricing terms and conditions based on finishes selected.
